

REQUEST FOR CITY COUNCIL CONSIDERATION

Meeting Date: January 8, 2007

Agenda Item: 5(C)	Prepared By: Rony Joel, Public Works Director Date: November 27, 2006
Agenda Section: Business: Consent Agenda	
Subject: Approval to Execute a Utility Work Agreement to FDOT for the Jolley Bridge Project	Department: Marco Island Utilities

BACKGROUND:

City Council is asked to adopt a resolution and execute a Utility Work Agreement with the Florida Department of Transportation (FDOT) for the S.S. Jolley Bridge Project.

The FDOT proposes to construct or re-construct a transportation facility known as the S.S. Jolley Bridge Project, S.R. 951, Collier County, FDOT Project No. 195410-1-52-01.

The City currently has a 16" water line on the existing bridge and a 30" water line under the Marco Island River. The 16" and 30" pipe will eventually need to be replaced. This agreement will ensure that if a new bridge is ever built, the City will have the option, at that time, to mount new pipes on the new bridge. Based on this agreement, FDOT will incorporate into the current design the capability to mount the future pipes. This is documented in Exhibit A of the agreement (Utility Work Schedule and Utility drawings attached).

In order for the FDOT to proceed with the Project and allow the City to use the bridge structure for Utility pipe support, it is necessary for the Marco Island Utilities to execute and deliver to the FDOT an agreement identified as "Utility Work Agreement (at UAO's sole expense) FPI: 195410-1-52-01."

The resolution and agreement is presented.

RECOMMENDED ACTION:

Adopt the resolution and authorize the City Council Chairwoman to execute the Utility Work Agreement with the FDOT.
