U.S. DEPARTMENT OF HOMELAND SECURITY Federal Emergency Management Agency National Flood Insurance Program

OMB No. 1660-0008 Expiration Date: November 30, 2022

ELEVATION CERTIFICATE

Important: Follow the instructions on pages 1–9.

Copy all pages of this Elevation Certificate and all attachments for (1) community official, (2) insurance agent/company, and (3) building owner.

SECTION A - PROPERTY INFORMATION FOR INSURANCE COMPANY					ANCE COMPANY USE		
A1. Building Owner's Name STEVEN and BARBARA WILLIAMS Policy Number:						per:	
A2. Building Street Address (including Apt., Unit, Suite, and/or Bldg. No.) or P.O. Route and Company NAIC Number: 38 GULFPORT COURT						AIC Number:	
City MARCO ISLAND			State Florida		ZIP Code 34145		
A3. Property Description (Lot LOT 5, BLOCK 97 OF MA				•	•	COUNTY, FLORIDA.	
A4. Building Use (e.g., Resid	ential, Non-Residential,	Addition	Accessory, e	etc.)	residential		
A5. Latitude/Longitude: Lat.	N 25°56'11.09"	Long.	W 81°42'10.3	32" Horizontal I	Datum: NAD 1	927 × NAD 1983	
A6. Attach at least 2 photogra	aphs of the building if the	e Certific	ate is being u	sed to obtain flood	insurance.		
A7. Building Diagram Numbe	r1B						
A8. For a building with a craw	/Ispace or enclosure(s):						
a) Square footage of cra	wlspace or enclosure(s)			N/A sq ft			
b) Number of permanent	flood openings in the cra	awlspace	e or enclosure	e(s) within 1.0 foot a	above adjacent gra	de N/A	
c) Total net area of flood	openings in A8.b		N/A sq in				
d) Engineered flood oper	nings? ☐ Yes ※ N	No					
A9. For a building with an atta	ched garage:						
a) Square footage of atta	ched garage		619.00 sq ft				
b) Number of permanent	flood openings in the at	tached g	arage within	1.0 foot above adja	cent grade 2		
c) Total net area of flood	openings in A9.b		360.00*sq	in			
d) Engineered flood oper	nings? ⊠ Yes □ N	No.

Certification of Engineered Flood Openings

In accordance with the Code of Federal Regulations for the National Flood Insurance Program

I hereby certify that the Crawl Space Door Systems flood vents 816CS, 1220CS, 1232CS, 1616CS, 1632CS, 2032CS, 2424CS, and 2436CS are designed in accordance with the requirements of the Code of Federal Regulations for the National Flood Insurance Program (NFIP) to provide automatic equalization of hydrostatic flood forces by alleging for the national Flood Insurance Program (NFIP)

to provide automatic equalization of hydrostatic flood forces by allowing for the entry and exit of floodwaters, when properly installed and sized as set forth below. Vent opening measurements were measured and certified by Mr. Christopher Mark Loney, Virginia P.E. NO. 029000. Detailed calculations were prepared as outlined In "Review of certification of Engineered Flood Openings," prepared by Dr. Georg Reichard, Associate Professor of Building Construction, Virginia Tech (available upon request from Crawl Space Door Systems, Inc. billy@crawlspacedoors.com)

Design Characteristics

Section 2.6.2.2 of ASCE/SEI 24-05 provides an equation to determine the required <u>net area</u> of engineered openings (A_o) for a given <u>enclosed area</u> (A_e). This equation is based on the hydraulic formula for the flow rate across sharp edged orifices. I have utilized this equation to calculate 1) the restricted flow rate through the main frame opening in case the louver is blown out during a flood event; 2) the flow rate through the individual openings between louver blades; and 3) the flow rate through projected openings between louver blades following hydraulic short-tube theory. The maximum total enclosed area (A_e) that can be serviced by a single vent has then been determined by utilizing the lowest flow rate of the three assessed scenarios for each vent and is listed in Table 1. These values are based on the following assumptions:

- In absence of reliable data, the rates of rise and fall have been assumed at a minimum rate of 5 feet/hour;
- The (maximum) difference between the exterior and interior floodwater levels shall not exceed 1 foot during base flood conditions;
- A factor of safety of 5 has been assumed, which is consistent with design practices related to protection of life and property;
- The net area of openings (A_o) as provided by the manufacturer.

*)	Model	HxW [in]	A _o [in ²]	A _e [ft ²]	
	816CS	8 x 16	105	205	7
	1220CS	12 x 20	235	500	٦
	1232CS	12 x 32	305	645	1
W	1616CS	16 x 16	180	395	1
	1624CS	16 x 24	310	670	
	1632CS	16 x 32	405	835	
	2032CS	20 x 32	630	1240	1
	2424CS	24 x 24	570	1230	1
	2436CS	24 x 36	850	1765	1

Table 1 Maximum total <u>enclosed area</u> (A_e) that can be serviced by each individual model based on the given <u>net area</u> of engineered openings (A_o)

Installation Requirements and Limitations

This certification will be voided if the following installation requirements and limitations are not enforced:

- There shall be a minimum of two openings on different sides of each enclosed area subject to flooding:
- The bottom of all openings shall be no higher than one foot above the higher of the interior or exterior grade that is immediately under each opening;
- No temporary (e.g. during cold weather) or permanent solid cover may be placed into or over the flood vent that would block the automatic entry or exit of floodwaters at any time;
- Where data or analyses indicate more rapid rates of rise and fall, the required number of openings shall be increased to account
 for those different conditions. The number or size of the openings may be decreased if data or analyses indicate rates of rise
 and fall are less than 5 feet per hour.
