

NOTICE TO CONTRACTORS

Date: September 11, 2009

Subject: Design Manuals for Aluminum Structures

As of October 1, 2009, the only design manual that will be accepted by the City of Marco Island is the AAF Guide to Aluminum Construction in High Wind Areas, as provided in sec 2002.4.1 of the 2007 Florida Building Code.

The City will accept contractor generated designs for screen cages. Although manuals may provide engineering details the layout sheets must be signed, dated and sealed by the engineer.

Thank you,

Robert Mahar
Building Official
