## **BOIL WATER NOTICE RESCINDED FOR SOUTHERN PART OF MARCO ISLAND**

(April 1, 2024) As of 10:30am on April 1, 2024, the boil water notice for the southern portion of Marco Island has been rescinded. The area impacted by this boil water notice included areas west and south of the Winterberry Bridge, and south of Winterberry Drive and South Barfield Drive.

The boil water notice was put in place early on March 30<sup>th</sup> after a failure at the South Water Treatment Plant which caused a pump to shut down leading to low pressure in the water lines. The notice was issued as a precaution until water samples were collected and analyzed. This was done because any loss in water pressure creates the possibility of harmful bacteria entering the lines. The water tests came back clear.

We apologize for the inconvenience to our residents over the holiday weekend.
