Report Time : 11:24:53AM

Project: MARCO
Report#: 0519_MRCO_II

Data Qualifier Code Key:

I: The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit
U: The compound was analyzed for but not detected
Q: Sample held beyond acceptable holding time
J: Estimate value; the reported value failed to meet established criteria for either precision or accuracy
V: Analyte detected in both the sample and the associated method blank
B: Colony count is generated from plates in which the total number of colonies is outside the method indicated ideal range
Y: The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
G: Indicates that the analyte was detected at or above the method detection limit in both the sample and the associated field blank, equipment blank, or trip blank, and the blank value was greater than 10% of the associated sample value.

Analyses performed using EPA or Standard Methods and certified to meet NELAC Standards. Data qualifiers assigned according to F.A.C. 62-160. Results contained in this report relate only to the samples collected.
